Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

A compromised gasket on a pumping unit resulted in approximately 1 bbl of oil misting across the pad surface. The release was contained to the road base plated pad surface. The impacted soil is scheduled to be removed. Confirmation soil samples will be collected and submitted for laboratory analysis in accordance with Table 915-1. Analytical results will be provided in a subsequent report.
