This is a correction to form sent in about April 5, 1951 the correction is 990ft. from the north line instead of 1290' ft.
 Plan to set approximately 300' ft. of 10-3/4" surface casing. Cementing same from bottom too top with cement. From that depth 300' plan to drill 9" hole too test all sands to depth Dakota Sands which is approximately 5400' ft. If we get a productive well in any sand we will set 7" 23# casing.
