(DETAILS OF WORK)

It is proposed to plug and abandon this well which was completed, as a gas well, on August 20, 1950. The original completion and testing program was very extensive and final completion in "J" sand as a gas well was the only solution as there was no commercial production in other zones tested.

A re-completion attempt was made in August of 1955 to increase gas production but was unable to shut off water entry and well was temporarily abandoned.
