**General Comment:**

COGCC Inspection Report Summary  
 On Wednesday 1/5/2022 at approximately 1300, I, Inspector Scott Ramsey, conducted a routine inspection at Caerus J26NW, at Location # 335308 in Garfield county Colorado.  
 While there, I observed well was shut in. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area and 411 water protection. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls.

Location and access road snow covered. Not plowed.

During this inspection the following compliance issues were observed:

1. Separator units include attached storage tanks. The sight glass located on the side of the unit indicates the storage tank is full of an unknown fluid. No form of labeling or markers are present to identify a potential hazard or the contents of the storage tank.
2. Lack of battery signage.
3. Location/access is not plowed, no access for EMS.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
