

Northern Natural Gas Producing Company
McKenzie-FLB-"A"-1 Well

Page Two

eight feet of permeable sand in the interval, together with estimated reservoir fluid characteristics considered applicable. These estimates are presented on page one of the report and are subject to the conditions set forth in the body of and in the footnotes to the summary page.

"J" sand from 5967 to 5982 feet has zero permeability at all points analyzed and is nonproductive.

We sincerely appreciate this opportunity to be of service to you and trust that this report will prove useful in making a preliminary evaluation of "J" sand analyzed from this well.

Very truly yours,

Core Laboratories, Inc.
