Re: Well Information #1-A McKenzie FLB  
Developed Lease #5709

Gentlemen:

This will acknowledge our receipt of your memographed request of January 14, 1958, signed by Leona Douchett in which you requested copies of the Induction, Gamma Ray and Neutron Logs and a copy of the core analysis pertaining to the captioned test.

Your request was sent directly to our Omaha Office and has just been received in the Denver District Office. I regret the delay in supplying the following information which is enclosed:-

1. Field print copy of the Induction Log.
2. Field print copy of the Micro Log.
3. Field print of Gamma Ray Collar Log. Our Completion Report (Form #5) delivered to your office on January 9, 1958, indicated this to be a Gamma Ray Neutron, where in fact it was only a Gamma Ray Collar log. Please correct your copy of this Well Completion Report.
4. Copy of core analysis prepared by Core Laboratories, Inc.

It is a pleasure to supply the requested information as sufficient copies of the foregoing were available.

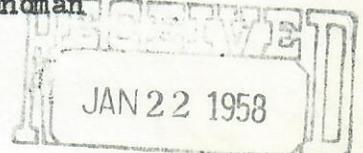

Do not hesitate to call on us if we can be of further service.

Respectfully,

Adam M. Butler  
Denver District Landman
