Permit	Discussed with operator via email. This is related to Form 6 NOI 402922153. Per operator, NBRR was perforated but the frac failed and the formation never produced. 5A submitted so a record of the perms is present in the well file, but formation status is CM since no production can be reported for it. Per operator, no ops report is available due to the age of the completion. Permitting review complete.	01/18/2022
