**General Comment:**

COGCC Inspection Report Summary

On Wednesday 1/12/2022 at approximately 1000, I, Inspector Scott Ramsey, conducted a routine inspection at TEP Valley farms L, at Location # 436713 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area and 411 water protection. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad.

Location and access are snow covered at the time of inspection.

During this inspection the following compliance issues were observed:

1. Separator units include attached storage tanks. The sight glass located on the side of the unit indicates the storage tank is full of an unknown fluid. No form of labeling or markers are present to identify a potential hazard or the contents of the storage tank.
2. Unused/stored chemical tanks
3. Multiple areas of staining present throughout location.
4. Random debris throughout out location.
5. Dirt pile not identified or contained properly (waddles have been plowed over)

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
