General Comment:

On 1/14/2022 Catherine Roy conducted a followup reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

-Control weeds by 6/1/2022.

-Assess revegetation on the northwestern fill slope by 6/1/2022, to determine whether additional revegetation/stabilization measures are needed here.

See below, and attached photos for additional detail.

-Due to snow cover portions of the project area with corrective actions identified during a 2020 reclamation inspection were not assessed.

-Corrective action followup from operations inspection will be assessed by an operations inspector.

VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____

Comment Location partially snow covered. Portions of the northwestern fill slope where there snow was not present, appear to support little desirable vegetation and appear to need revegetation/additional stabilization. Additionally, approximately 200 Russian knapweeds were observed on this slope.

Corrective Action -Control weeds by 6/1/2022.
-Assess revegetation on the northwestern fill slope by 6/1/2022, to determine whether additional revegetation/stabilization measures are needed here.
