Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A visual inspection will be performed looking for signs of stained or contaminated soil, potential leaching to surface waters and effects on vegetation. If contaminants are found, COGCC will be notified and a remediation plan will be submitted. If groundwater is encountered during equipment removal, COGCC will be notified immediately.

PROPOSED SAMPLING PLAN**Proposed Soil Sampling**☐ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Soil samples will be performed if signs of contamination are found upon equipment removal, otherwise no sampling will be conducted.

Proposed Groundwater Sampling☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

A visual inspection will be performed looking for signs of stained or contaminated soil, potential leaching to surface waters and effects on vegetation. If contaminants are found, COGCC will be notified and a remediation plan will be submitted. If groundwater is encountered during equipment removal, COGCC will be notified immediately.
