COGCC Comments

Comment	User	Date
All disturbed areas must be recontoured, properly decompacted by cross ripping to a depth of 18 inches, have an adequate seedbed prepared, and then seeded with a seed mixture that reflects the surrounding vegetation as agreed upon with the surface owner and as prescribed by the local soil conservation district. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Continue to monitor and manage this site until Final Reclamation has Passed.	CostaR	01/14/2022
