

6 Month Abatement Summary

	Well: Peterson 1-20
	API: 05123134600000

Bradenhead Test Data	Date	Event Measurement
Form 17 Bradenhead Test Report (psig)	4/13/2021	50
Abatement System Commission Date	6/30/2021	-
Form 17 Bradenhead Test Report, Follow Up (psig)	12/23/2021	20
Abatement System Volume Measurement (CF/Day)	9/25/2021	7.78

Comments: April 2021 annual test had 50 PSI whisper gas flow that blew down to 0 psi within thirty minutes. December 2021 follow-up test had 20 PSI whisper gas flow that blew down to 0 PSI within first few minutes of test with no flow for the remainder of the test. Bradenhead gas determined to be thermogenic gas with a similar composition as the production gas sample. Bradenhead pressure remains below 50 psi limit when abatement system is operating. PDC will continue to remediate pressure using the installed abatement system. (This well is not equipped with a bradenhead pressure transducer.)
