**General Comment:**

-This is a desktop inspection conducted to document review of flowline information provided by operator at the 067-07683 PA well location, southwest of this active location (067-07814). It appears that the currently active flowline that services this location will require abandonment after this well is PA'd. Therefore please refer to inspection 693904155 to verify reclamation requirement at the nearby PA location that is contingent upon this flowline abandonment.

In short, Operator has indicated that the 067-07683 access road and a portion of the well pad are needed to access flowline valves. Equipment observed on the location is associated with the flowline infrastructure. Final reclamation will be required at the 067-07683 location when flowline abandonment occurs.
