Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This form 27 is being submitted to generate a REM # for the HSC 3 site for P&A/Facility Decommission as per Rule 911.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

During facility decommission, soil samples will be collected under equipment locations that would have had the most likely areas for impacts. Dumphline and Flowline will be assessed during removal with field screening and will likely be sampled at the most likely contaminated area that is related to other equipment on-site for tie in locations. All samples will be collected as grabs and analyzed for table 915. See attached diagram for assessment areas. Soil sampling diagram will be updated when assessment is completed and supplied on supplemental form 27(s).

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

All on-site documentation (Photos, lab reports, diagrams, etc) will be provided on supplemental form 27(s). If impacts are identified, COGCC will be notified and a form 19 will be submitted.

Describe how source is to be removed.

TBD - at this moment, source removal is not expected but will be updated if remediation is needed for removal.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan).
