17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Ramey No. 3 was completed as an oil well in June, 1951, in the "J" sand. The reservoir produces by active water drive. The well has produced water since completion and has been perforated higher in the "J" sand section on four occasions to increase oil and gas recovery. The production history of the well indicates that the oil and gas pay is depleted in this well and further attempts to improve recovery will not be needed for secondary or tertiary recovery, as the reservoir is not a candidate for such operations, therefore it is recommended that the Ramey No. 3 be plugged and abandoned.

The well has been sold for salvage to Bovaird Supply Company, Great Bend, Kansas.
