Photo 1. View of project area from the well pad entrance facing center.

Photo 2. View of the western project area from the southwestern corner facing northward. Revegetation is progressing largely in a grazed condition with western wheatgrass, crested wheatgrass, and sand dropseed observable.

Photo 3. View of southern project area from the southeastern corner facing westward.

Photo 4. View of reference area comprised of sagebrush shrubland, understory largely snow covered at this time.
