Brian

After reviewing the CBL, I would make one change on the lower plug.

Perforate at 7000' and pump 50 sacks of cement leaving 100' in the casing.

The rest of the plugs look good.

Eric

Eric,

Just wanted to give you a heads up. We're planning on pulling the CBL pass on this well tomorrow afternoon/Thursday morning. With CPW's guidance to get this done ASAP, we're going to try and cram as much in as possible as fast as we can, so I just wanted to let you know to keep an eye out for it in case we need to adjust.

Thanks,

**Brian Stanley**
