### DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	Unknown	Undetermined

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

KPK was notified by Occidental Petroleum about the Cosslett #3 flowline release. Upon notification of the release, KPK immediately shut-in the flowline. Excavation equipment was brought in to remove surface staining only. Additional excavation could not be performed due to co-located flowlines in the area. A hydrovac unit will be needed to continue excavation activities. No pooled liquids were present upon arrival at the location of the release. Based on the observation of minimal surface staining, it is estimated that the release was less than 1 bbl of fluid. Flowline failure occurred due to ground settling as a result of recent installation of flowline by separate operator. Damaged section of flowline will be repaired and flowline will be pressure tested before being brought back into service.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Final vertical and horizontal extent of the excavation will be based on results from collected grab soil samples. all soil Samples will be analyzed for TPH, DRO, GRO, ORO, BTEX, pH, EC, and SAR and verified complaint with COGCC Tale 910-1. At a minimum, one grab sample will be collected from each excavation wall as well as from the base of the excavation area.

#### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during excavation activities, one (1) grab sample will be collected and verified complaint with COGCC Table 910-1. If analytical results exceed Table 910-1 thresholds, a Form 27 Site Investigation and Remediation Workplan for the investigation and remediation of impacts to groundwater in accordance with Rule 909.c. will be submitted.

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):
