### REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes

#### SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Based on the attached Q4 powered-SVE trailer results, Caerus proposes to conduct quarterly SVE of the site with augmented solar-powered SVE trailer events (when a trailer is available) to remove the source of impacts associated with this project. Once SVE trailer exhaust data indicates remediation is near completion, Caerus will conduct soil boring installation to demonstrate compliance with the reduced analyte suite and the additional analytes found on the COGCC Table 915-1 soil standards.

#### REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Based on the attached Q4 powered-SVE trailer results, Caerus proposes to conduct quarterly SVE of the site with augmented solar-powered SVE trailer events (when a trailer is available) to remove the source of impacts associated with this project. Caerus will closely monitor SVE data to determine the estimated time to successfully remediate the project. Once SVE trailer exhaust data indicates remediation is near completion, Caerus will conduct soil boring installation to demonstrate compliance with the reduced analyte suite and the additional analytes found on the COGCC Table 915-1 soil standards.
