Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Please refer to previously submitted eForms associated with Spill/Release Point ID 457694 and Remediation Number 11913 for this information.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☐ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Per COA #4 listed on COGCC Document 401814737, quarterly groundwater samples will be collected from WFMW1, WFMW2, and WFMW3 for 12 months. These samples will be submitted for analysis of BTEX, naphthalene, 1,2,4-trimethylbenzene, and 1,3,5-trimethylbenzene. Caerus will include the new proposed WFMW17 to this list of quarterly groundwater wells to be sampled.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Per COA #3 listed on COGCC Document 401814737, quarterly surface water samples will be collected from the irrigation pond (WFPL Pond) adjacent to the impacted area for 12 months. These samples will be submitted for analysis of BTEX, naphthalene, 1,2,4-trimethylbenzene, and 1,3,5-trimethylbenzene.

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Please refer to COGCC Document #402121551 for this information.

REMEDIAL ACTION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Caerus will continue to utilize soil vapor extraction to remediate impacts to soil within the area. When groundwater elevation rises to accessible levels for air sparge, Caerus will utilize an air sparge trailer to remediate and provide oxygen to the remediation system. Please refer to Figures 2 and 3 attached to this document for reference of groundwater elevation and the well construction in the project area.

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Please see the attached tabulated laboratory data for quarterly groundwater sampling and monitoring from remediation and monitoring wells within the spill area. Please note that due to increased groundwater depth resulting in no available water, some monitoring and remediation wells were not sampled during the quarter.

Included in the attached figures are potentiometric groundwater flow direction maps for each monthly sampling event.

Based on the increased groundwater depth and unimpacted groundwater sample results down-gradient of the spill, Caerus requests to change the groundwater sampling frequency to quarterly. During elevated groundwater flows identifying groundwater depth near the zone of impacted soil, Caerus will focus efforts to collect water samples to determine presence of impacted groundwater. If groundwater is impacted, Caerus will conduct additional air-sparging activities to remediate any hydrocarbons found in groundwater at the site.

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

☐ Compliant with Rule 913.h.(1).☐ Compliant with Rule 913.h.(2).☐ Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards?

Does the previous reply indicate consideration of background concentrations?

Does Groundwater meet Table 915-1 standards?

Is additional groundwater monitoring to be conducted?

Operator shall comply with the COGCC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Please refer to COGCC Document ID 401784284 for planned reclamation.

Is the described reclamation complete? Yes

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☒ Interim ☐ Final

Did the Surface Owner provide the seed mix? Yes

If YES, does the seed mix comply with local soil conservation district recommendations? Yes
