Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A COGCC inspection on 10/27/2021 identified two areas with stressed vegetation that are likely related to historical spills.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

On November 9, 2021, four soil samples were collected throughout the areas with stressed vegetation. All samples were submitted for analysis of Table 915-1's soil suitability for reclamation parameters. Results are attached.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

OPERATOR COMMENT

Gypsum has been ordered from a supplier in Fort Collins and transportation to the site is currently being arranged. Reclamation activities will begin this spring as soon as possible once the gypsum is delivered to the site and a work crew is available. Work with heavy equipment in this area is difficult to schedule and is dependent on contractor availability.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
