General Comment:

COGCC Inspection Report Summary

On Wednesday 2/16/2022 at approximately 1100, I, Inspector Scott Ramsey, conducted a routine inspection at Caerus Savage 8-11A, at Location # 335006 in Garfield county Colorado.

Any Corrective Actions from previous Inspections that have not been addressed are still applicable.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls.

Location and access road snow covered. Plowed. Location equipment have signs stating that H2S may be present.

During this inspection the following compliance issues were observed:

1. Separator unit include attached storage tank. The sight glass located on the side of the unit indicates the storage tank is full of an unknown fluid. No form of labeling or markers are present to identify a potential hazard or the contents of the storage tank.
2. Load lines missing plugs/caps.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
