**General Comment:**

Routine compliance follow up inspection. Follow up to inspection from 2/2/2022 document number 689807036. Bradenhead access has been installed, snow cover limited ability to see if stained soil had been removed. Compliance issue remaining outstanding: flaring produced gas - both combustors lit

|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Type               | Ignitor/Combustor                                                                                                                                                                                                                        |
| Comment:           | Both combustors lit and flaring produced gas and tank flash emissions. Pumper informed inspector that field has been re plumbed to send all gas to the tank(s) and then to send that gas from the tank(s) to the combustor to be flared. |
| Corrective Action: | Immediately cease flaring.                                                                                                                                                                                                               |
