Comment:

Wolf 44-31 well was plugged and reclaimed in 2014, and in 2018, Suncor disturbed the former wellhead area and access road. Available aerial images show the previous reclamation before re-disturbance. The associated production facility was abandoned and reclaimed in June 2021 after the last well was plugged in spring 2021. This reclamation was in the first growing season which had record heat and very little precipitation. However, since a location assessment was already performed, PDC will reseed prior to the Spring growing season. CA complete.
