COMMENTS:

TEP Rocky Mountain LLC (TEP) is requesting an MIT Deferral for the FEDERAL BCU 34-8-198 (API# 05-103-10903) in the event we are unable to show production prior to the 2-year MIT date. This well is part of the Barcus Creek system, which has been shut in over the past two years due to contractual gathering and facility issues. TEP has been working with the gathering service provider and intends on flowing the wells in the next two weeks to test the gathering system and demonstrate production. If we are delayed in flowing the wells for the gathering system test, an MIT Deferral for up to 60 days is requested. The tubing pressure of the FEDERAL BCU 34-8-198 is 2,092 and the monthly average production prior to shutting in was 23 MCFD. A bradenhead test was performed in 2021.
