212932	WELL	PR	06/01/2020	GW	061-06293	MUIR E J 2	EI

General Comment:

Environmental inspection found easily visible, large area of bare soil off north side of well pad indicating an environmental impact from spill of produced water (see attached photos). This spill was also reported via COGCC inspection 689901347 on 10/7/2019. Aerial photos indicate spill is over 20 years old. Operator has taken no action to remediate spill area since the spill was originally reported via COGCC inspection. Operator shall take immediate action to remediate/reclaim spill area to avoid enforcement action.

Operator shall submit a Form 19 spill report to Area EPS reporting spill of E&P waste (see corrective action).

Operator shall collect confirmation soil samples as described in the Rule 915.e.(2) Guidance Document. Operator will analyze soil samples for TPH (C6-C36), Table 915-1 Organic Compounds in Soil, Table 915-1 metals, and Table 915-1 Soil Suitability for Reclamation (Electrical conductivity, Sodium adsorption ratio, and pH by saturated paste method, boron (hot water soluble)).

Facility ID: 212932 Type: WELL API Number: 061-06293 Status: PR Insp. Status: EI

Environmental

Spills/Releases:

Type of Spill: PRODUCED WATER Estimated Spill Volume: _____

Comment: A large 0.85 acre area of bare soil is present north of well pad indicating a historic spill of produced water. This spill was originally discovered during COGCC inspection 689901347 on 10/7/2019. Operator has not taken action to remediate spill area or address the original corrective action requesting soil samples that was due 12/10/2019

Corrective Action: Report spill or release of E&P waste or produced fluids via Form 19. Submit proposed soil sampling plan on Form 19. Date: 12/13/2019
