COGCC Comments

Comment	User	Date
<p>At time of inspection master valve was in close position, all other flowlines and casing valves were also in close position. Annual bradenhead test needs to be performed on all P3 wells.</p> <p>Because P3 is not actively managing any of its Colorado Wells or Locations there is a direct threat to public health, safety and welfare, including the environment and wildlife resources. Therefore, the COGCC will undertake steps to, at a minimum, shut-in all of P3's wells and lock-out/tag-out P3's flowlines. COGCC may take additional actions to protect public health, safety and welfare, including the environment and wildlife resources, without providing advanced notice.</p>	medinaj	03/01/2022
