Notes:

bgs - below ground surface

µg/L - micrograms per liter

-- - not measured

< - indicates the result is less than laboratory reporting limit

COGCC - Colorado Oil and Gas Conservation Commission

Bold indicates result exceeds the applicable COGCC Table 915-1 Concentration Level

ND - not detected

***Inorganic Background Determination:** In September 2020, WSP USA INC. collected water samples from four existing landowner wells within 0.3 miles of the release area. The samples were uploaded to COGCC with sample IDs 619813, 619814, 619815, and 619816. The highest sulfate and total dissolved solids concentrations were 550 mg/L and 1,300 mg/L, respectively. This establishes the COGCC site specific background standards (1.25 X background) for sulfate and total dissolved solids at 687.5 mg/L and 1,625 mg/L, respectively.
