Inspection Photos

Location Name: UPRR-BESSIE 1

Location ID: 320144

Pic 3 wellhead, master valve and flowline valves were in the close position at time of inspection.

Pic 4 During inspection it was discovered that the wellhead was leaking gas out of the top of gauge pictured. Ball valve is seized in the slight open position, needle valve was open and shut during inspection. Needle valve is damaged and still has a slight leak of gas.
