**COGCC Comments**

| Comment   | User    | Date       |
|---|---------|------------|
| <p>At time of inspection master valve and casing valve were in the open position. During inspection both casing and master valve were put in the close position. Flowline valve is siezed in the open position. Bradenhead valve is in the close position.</p> <p>Because P3 is not actively managing any of its Colorado Wells or Locations there is a direct threat to public health, safety and welfare, including the environment and wildlife resources. Therefore, the COGCC will undertake steps to, at a minimum, shut-in all of P3's wells and lock-out/tag-out P3's flowlines. COGCC may take additional actions to protect public health, safety and welfare, including the environment and wildlife resources, without providing advanced notice.</p> | medinaj | 03/03/2022 |
