GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Tasman Geosciences, under the direction of PDC Energy, Inc., collects water samples from the influent and effluent process streams of the methane mitigation systems installed on DWR Well Permit #137465 and #268360 on a quarterly basis and submits them to Summit Scientific Laboratories for analysis of dissolved gases by EPA Method RSK 175. In addition, the samples collected from the influent process streams are submitted to Dolan Integration Group (DIG) for hydrocarbon gas composition and stable isotopes analysis. Please refer to the attached 4Q21 Groundwater Monitoring Reports associated with DWR Well Permit #137465 and #268360 for a summary of the fourth quarter 2021 sampling event.

First quarter 2022 System sampling and maintenance will be conducted at the DWR Well Permit #137465 in February 2022 and at the DWR Well Permit #268360 in March 2022.
