<p>COGCC Inspection Report Summary                      On Friday 3-11-2022 at approximately 1130 hrs. I, Inspector Robbie Revas,                      Conducted an on-site inspection:                      Operator: Painted Pegasus Petroleum                      Location name: Abbott 11-14                      API #05-001-08135                      County: Adams                      Weather: Clear.                      Location: Snow covered.                      While there, I observed a wellsite and tank battery.                      Because P3 is not actively managing any of its Colorado Wells or Locations there is a direct threat to public health, safety and welfare, including the environment and wildlife resources. Therefore, the COGCC will undertake steps to, at a minimum, shut-in all of P3's wells and lock-out/tag-out P3's flow lines. COGCC may take additional actions to protect public health, safety and welfare, including the environment and wildlife resources, without providing advanced notice.                      During this inspection, I observed the following possible compliance issues:                      Stained soil by WH, Tubing lying on ground by WH and weeds.                      See attached photos.                      No follow up to this site inspection will be conducted to ensure that                      Corrective actions are corrected to comply with COGCC rules.</p>	revasr	03/11/2022
