<p>COGCC Inspection Report Summary                      On Monday 3-14-2022 at approximately 1450 hrs. I, Inspector Robbie Revas, Conducted an on-site inspection:                      Operator: Painted Pegasus Petroleum                      Location name: Frihauf-USX CK 25-23                      API #05-001-09636                      County: Adams                      Weather: Clear.                      Location: Dry.                      While there, I observed wellsite and tank battery.                      Because P3 is not actively managing any of its Colorado Wells or Locations there is a direct threat to public health, safety and welfare, including the environment and wildlife resources. Therefore, the COGCC will undertake steps to, at a minimum, shut-in all of P3's wells and lock-out/tag-out P3's flow lines. COGCC may take additional actions to protect public health, safety and welfare, including the environment and wildlife resources, without providing advanced notice.                      During this inspection, I observed the following possible compliance issues:                      606 housekeeping: weeds overgrown and tumble throughout wellsite and tank battery location.                      See attached photos.                      No follow up inspection will be conducted to ensure that                      Compliance issues have been corrected to comply with COGCC rules.</p>	revasr	03/14/2022
