## Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

### DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	Unknown	Visually/Lab Analysis

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

If impacted soils are encountered, as exhibited by visible oil, staining, odor, or elevated field readings, emergency response measures taken will include excavation and temporarily stockpiling soils on location. Impacted soils will be disposed off-location at a commercial disposal facility. Confirmation soil samples will be collected, submitted for laboratory analysis of Table 915-1 parameters. Currently the investigation is expected to start 10 days after the project is awarded and is proposed for 04/11/2022.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples will be collected from around the Kalcevic 22-3 wellhead and at the ends of the off-location flowline(s). At a minimum grab soil samples will be collected from beneath the aboveground storage tanks, separator, loadout, and any areas of stained soils. Soil samples will be analyzed for Table 915-1 parameters and results will be compared with Table 915-1 concentrations or levels.

#### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Groundwater samples are not expected to be collected as part of this initial investigation.

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Surface water samples are not expected to be collected as part of this initial investigation.

### Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Additional Alternative investigative actions are not expected to be conducted as part of this initial Site Investigation Plan.
