<p>COGCC Inspection Report Summary                      On Tuesday 3-15-2022 at approximately 1625 hrs. I, Inspector Robbie Revas,                      Conducted an on-site inspection:                      Operator: Painted Pegasus Petroleum                      Location name: HSR-Barclay 13-29                      API #05-001-09305                      County: Adams                      Weather: Clear.                      Location: Dry.                      While there, I observed wellsite and tank battery.                      Because P3 is not actively managing any of its Colorado Wells or Locations there is a direct threat to public health, safety and welfare, including the environment and wildlife resources. Therefore, the COGCC will undertake steps to, at a minimum, shut-in all of P3's wells and lock-out/tag-out P3's flow lines. COGCC may take additional actions to protect public health, safety and welfare, including the environment and wildlife resources, without providing advanced notice.                      During this inspection, I observed the following possible compliance issues:                      606 housekeeping: Weeds throught TB location.                      See attached photos.                      No follow up inspection will be conducted to ensure that                      Compliance issues are corrected to comply with COGCC rules.</p>	revasr	03/15/2022
