Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

ONCE ALL EQUIPMENT HAS BEEN REMOVED, ANY VISIBLY STAINED SOIL WILL BE EXCAVATED AND STOCKPILED ONSITE UNTIL CONFIRMATION SAMPLING HAS BEEN COMPLETED.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Soil sampling will be conducted at the pit locations, tank battery, and wellhead pad. Samples to be analyzed for TPH & BTEX from grab samples taken at the pit bottoms & banks. 2 composite samples will be taken from a grid at the tank battery, one composite from the wellhead, and one from each pit area for analysis for EC, SAR, pH, and boron. Grab samples will be obtained at the depths of the riser plugging for BTEX & TPH.

Proposed Groundwater Sampling
