**COMMENTS:**

This well was plugged by a previous Operator and the marker had deteriorated. Whiting Oil and Gas potholed around the well to investigate. The well had been plugged correctly but the top of the surface casing had rotted. Whiting installed 6 feet of 12-inch casing around the existing well casing. The 12-inch casing was cemented in place with the top of the casing 4 feet below the surface and a new steel well marker plate welded in place.
