General Comment:

This is an environmental inspection. Any corrective actions from previous inspections that have not been addressed are still applicable.

On March 25, 2022 COGCC conducted an inspection of the Cub-Creek Knight Pad (Facility ID 457362) in response to Complaint Documents #402993953, #402994074, and 402994080. The complaints, filed anonymously, indicate multiple spills and environmental impacts are present on location.

COGCC inspector was accompanied by Lead Operator, Mike Gibbons on inspection. De-minimis staining, below reporting thresholds, was found at multiple locations on the facility.

At separators, inside lined containment (Photos 1-4)

Under bulks, inside lined (Photos 5-8)

Below scrubbers (Photo 11)

Adjacent to trip out pipe (Photo 15)

Meltwater with staining and paraffin was observed within the lined production tank containment (Photos 12, 13).

Meltwater within perimeter stormwater controls showed no indication of sheen, product or other impacts (Photos 9, 10).

Operator provided photos of staining removed at scrubbers and separators on March 27, 2022 (Operator Provided Photos 1-7). COGCC will conduct a followup inspection.

This is an environmental inspection. Any corrective actions from previous inspections that have not been addressed are still applicable. Photos attached to document site conditions.
