|                 | Operator states: "Lat and Lon were taken using a cell phone in a know poor service area, KPK suspects the coordinates are off and will update the coordinates on a supplemental19 when a Garmin unit can be taken out to location.". However, it appears the Lat/Long of the spill location has been updated. Operator shall clarify this statement on the next Supplemental Form 19.  |
|                 | Operator has not met the requirements of Rule 912.b.(4), the Operator shall make a supplemental report on Form 19 not more than 10 calendar days after the spill/release is discovered that includes:<br>A. A topographic map showing the governmental section and location of the spill or an aerial photograph showing the location of the spill<br>B. All pertinent information about the spill/release known to the Operator that has not been reported previously including a description of and photo documentation showing the source of the Spill or Release, the impacted area, and initial cleanup activity<br>C. Information relating to the initial mitigation, site investigation, and remediation measures conducted by the Operator<br>D. Global Positioning System data that meets the requirements of Rule 216. |
|                 | Operator shall collect confirmation soil samples as described in the Rule 915.e.(2) Guidance Document. |                 | On the next Form 19 Subsequent operator is to provide the root cause of the incident and preventative measures that will be taken to prevent reoccurrence on this and other flowlines at this location. Please give the location of the failure (i.e. 6 O'clock position) and if the root cause is corrosion explain if it is external or internal.  |
|                 | Operator shall comply with Table 915-1 Protection of Groundwater Soil Screening Level Concentrations.  |
|                 | In accordance with 913.d.(1) Operator will investigate impacts to soil, Groundwater, and surface water as soon as the impacts are discovered.  |
