General Comment:**COGCC Inspection Report Summary**

On Monday 4/4/2022 at approximately 1100, I, Inspector Scott Ramsey, conducted a routine inspection at Caerus Yellow Creek 27-13-1, at Location # 316449 in Rio Blanco county Colorado.

Any Corrective Actions from previous Inspections that have not been addressed are still applicable.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls.

During this inspection the following compliance issues were observed:

1. Access and location shows some signs of lack of stabilization/ compaction/ degradation/ erosion.
 2. Fill slope shows signs of lack of stabilization/ erosion.
 3. Lack of battery signage.
 4. Well head cellar is open along the edge.
 5. Random debris
 6. Tank burners are open for wildlife to enter.
- Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
