Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Please refer to COGCC Document #402121551 for this information.

REMEDIAL ACTION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Caerus will continue to utilize soil vapor extraction to remediate impacts to soil within the area. When groundwater elevation rises to accessible levels for air sparge, Caerus will utilize an air sparge trailer to remediate and provide oxygen to the remediation system. Please refer to Figures 2 and 3 attached to this document for reference of groundwater elevation and the well construction in the project area.

OPERATOR COMMENT

Please note that all wells which were not sampled in the project monitoring well network during the Q1 2022 sampling event were dry.

Due to weather conditions during the first quarter of 2022, Caerus was unable to conduct SVE activities at the site. Quarterly powered-trailer and solar-trailer SVE events will be conducted and reported on subsequent Form 27 submittals.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
