Good morning Richie,

Based on the information presented in your summary of work, it appears no further action is necessary at this time and the COGCC approves your closure request. However, if future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards, or if groundwater is found to be impacted, then further site investigation and/or remediation activities may be required. Your Summary of Work together with all of its attachments are being uploaded to the COGCC master record database and indexed to the records for Location #320229 and the McElwain #3 (API #05-001-08668).

Good morning team, I'm following up on the emails below and wondering when we can expect the issue at McElwain #3N to be closed out.

Any update would be great.

Thanks,

Good morning Chris,

I am following up to make sure you got this work summary letter a few weeks back, and also to check to see what the status of the review is?

Thanks so much,
