## SITE INVESTIGATION PLAN

### TYPE OF WASTE:

- ☐ E&P Waste ☒ Other E&P Waste ☐ Non-E&P Waste
- ☐ Produced Water ☐ Workover Fluids
- ☐ Oil ☐ Tank Bottoms
- ☐ Condensate ☐ Pigging Waste
- ☐ Drilling Fluids ☐ Rig Wash
- ☐ Drill Cuttings ☐ Spent Filters
- ☐ Pit Bottoms
- ☒ Other (as described by EPA) No impacts associated with this project have been identified.

### DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	To be determined.	Laboratory analysis of soil samples.

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This form is being submitted to comply with COGCC Rule 911.a.(4). The form serves as the initial notification to plug and abandon APACHE CANYON 6-9V (API# 05-071-09126) and close the associated Pit (COGCC Facility ID 292612).

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

- ☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

As part of the "cut and cap operations", the APACHE CANYON 6-9V wellhead will be excavated. The base and and sidewalls of the wellhead excavation will be visually inspected and field-screened. During the flowline abandonment, any liquids evacuated from the flowline will be properly contained and disposed of in compliance with Rule 905. XTO will field screen areas where the flowline connects to the wellhead and surface equipment and the approximate footprints of all previous associated equipment. Additionally the base and sidewalls of the pit will be field screened. If field screening indicates impacts to soil in any of these locations, the sample exhibiting the highest degree of impacts based on field screening will be collected from the associated area and submitted for laboratory analysis of the full list of soil constituents in COGCC Table 915-1. Continued in "Additional Investigative Actions" below.

#### Proposed Groundwater Sampling

- ☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during site investigation, a sample will be collected and submitted for analysis of Table 915-1 constituents of concern.

#### Proposed Surface Water Sampling

- ☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

- ☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Continued from "Proposed Soil Sampling". Any impacted soil will be segregated, stockpiled on site, and the extent of impacts will be investigated through additional excavation and confirmation soil sampling. If no impacts are observed, one sample will be collected from the base of the wellhead , immediately adjacent to the well, beneath the flowline connections to surface equipment, and in the middle of each equipment footprint. Additionally, samples will be collected from the base and sidewalls of the pit. Samples will be submitted for laboratory analysis of the full list of soil constituents in COGCC Table 915-1. A Site Diagram illustrating the wellhead and equipment locations is attached to this form. Additionally, background soil samples may be collected from comparable, nearby, non-impacted soil to establish native soil conditions for pH, electrical conductivity (EC), and sodium adsorption ratio (SAR), and boron per Rule 915.e.(2).D.
