Mr. Hofman,

Attached is a list of well "Locations" that are being transferred from Laramie Energy LLC to Black Hills Plateau Production (BHPP). I am notifying you of this transfer per COGCC requirements and as part of the process of completing Form 9s documenting this transfer.

BHPP has worked over the past 4 years to restore locations per COGCC requirements. There were no well facilities or equipment associated with the transfer. All wells have been plugged and abandoned, all equipment removed, and pits remediated. A few sites required groundwork to meet COGCC requirements for reestablishment of vegetative cover.

Please let me know that you received this notification.

Best regards and keep staying safe,

Joe Jenkins, PG, CHMM, CPESC
