General Comment:

Environmental**Spill/Remediation:**

Comment: COGCC Inspection of historical release reported by Operator discovered during decommissioning of well under Remediation Project 22308. Operator reported that "Laboratory analytical indicated a historical release occurred at the Miller 16-29 decommissioned wellhead. Four soil samples exceeded COGCC standards for TPH, 1,2,4-trimethylbenzene, 1-&2-methylnaphthalene, benzo(a)anthracene, and naphthalene." via Form 19. Excavation is currently backfilled Operator will submit results of investigation with a plan and schedule for further investigation or remediation via Form 27 Supplemental within 90 days (by July 27, 2022).
