**COMMENTS:**

This location was connected to a gathering system that was permanently abandoned by the third-party gathering company.

**GAS CAPTURE**

**VENTING AND FLARING:**

Operation type: Flaring      Operational phase requiring venting/flaring: Production

Reason for venting/flaring: Gathering Line Not Accessible

Describe Other reason for venting/flaring:

The SIERRA-MITCHELL 32-3 location is neither venting nor flaring gas, all gas is used on site and any residual gas is routed to an approved combustion device after separation.

Describe why venting or flaring is necessary. If reporting per Rule 903.b.(2), 903.c.(3).C, or 903.d.(2), include the explanation, rationale, and cause of the event:

This location was connected to a gathering system that was permanently abandoned by the third-party gathering company. Natural gas production is minimal. KP KAUFFMAN COMPANY INC is first utilizing the produced natural gas to run production

equipment onsite.

KP KAUFFMAN COMPANY INC., SIERRA-MITCHELL 32-3's produced gas is processed through an adequately sized separator, combustion of tank vapor after adequate separation is authorized by CDPHE-APCD. This location has an APEN with CDPHE, AIRS ID 005-1619.

Describe how the operation will protect and minimize adverse impacts to public health, safety, welfare, the environment, and wildlife resources. If reporting per Rule 903.d.(2), include BMPs used to minimize venting on the BMP Tab:

The SIERRA-MITCHELL 32-3 produces insufficient saleable quantity or quality gas to make such a long lateral pipeline to connect to a gas gathering system feasible or practicable. The nearest gas gathering line is approximately 1.5 miles away. Natural gas is utilized onsite to run production equipment. It is not vented.

Total volume of gas vented or flared: 0 mcf  estimated  measured

Total duration of emission event: 24 hours  consecutive  cumulative

Submit a single representative gas analysis via Form 43 to create a Sample Site Facility ID# for this Location. Reference the Form 43 document number on the Related Forms tab.

Sample Site Facility ID#: \_\_\_\_\_

**GAS CAPTURE PLAN**

Describe the plan to connect to a gathering line or beneficially use the gas; include anticipated timeline:

For the reasons stated above, connection to a gathering line is not feasible. The minimal natural gas produced is beneficially used onsite to run production equipment.

A Gas Capture Plan that meets the requirements of Rule 903.e is attached.
