OFF LOCATION FLOWLINE Abandonment Verification

Date: 07/31/2020

Abandonment Verification

The abandoned Off-Location Flowline was located within the jurisdiction(s) of the following local government(s).

(No Jurisdiction)

Description of Abandonment Verification:

Evacuate the flowline of any hydrocarbons to ensure the line is safe and inert, Deplete the flowline to atmospheric pressure, Cut the flowline risers to three (3) feet below grade or to the depth of the flowline, whichever is shallower, Seal the ends of the flowline line below grade and Remove any above-ground equipment associated with the riser.

The flowline between the Dita 1 well location and Dita production facility is underneath a gravel pit currently mined by LG Everist. The flow lines are buried between four and six feet below the surface. Removing the flow lines at this depth would involve displacing substantial soil that would severely impact LG Everist operations. TOP will leave the flow lines buried in place in order to avoid severe disruption to the gravel mining operations at this LG Everit location.
