TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: Operator did comply with the previous corrective action from 2020 by completing additional reclamation activities on 5/14/2020 (FIR Doc. 402421654). However, after two growing seasons, there is insufficient establishment and growth of desirable plant species. There appears to be limited establishment along the central portion of the well location while the northern and southern location lack establishment. Refer to the attached inspection photos.

Corrective Action:	<p>Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p> <p>Final reclamation activities shall be complete no later than 11/14/22 or as soon as environmental conditions will permit. Operator shall make every attempt to perform additional reclamation activities during Spring 2022.</p>	Date	11/14/2022
