While there, I observed a Production Facility

During this inspection the following possible compliance issues were observed:

Gap underneath production tanks. See Attached Pictures

Securely fasten all valves, pipes, fittings, and Production Facilities to ensure good mechanical condition, inspect at regular intervals and maintain in good mechanical condition per Rule 608.e.

No bull plugs on load out lines. See Attached Pictures

All load lines will be bull plugged or capped. 603i

A follow up on this site inspection needs to be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.
