**General Comment:**

On 5/5/2022 COGCC staff, Kris Neidel inspected the Walker 3-43 location. Conditions were; sunny, 50 degrees, the ground was slightly wet from recent precipitation. This inspection was in preparation of approving a Form 27 for location abandonment. The following was observed: wellhead, , there were flowlines at wellhead that were TA, there was one area that had flowline risers that appeared to be the former footprint of a piece of equipment, there were two surface water diversions that appeared to move water from the pad to adjacent land, the surface water diversions had some rock rip rap. See attached photos.
